

NEW HYDROBAG MODEL

HANDLE

Easily and safely carried by hand or trucks

PATENTED

NO WELDING ON THE UPPER SIDE

Higher safety
25% more resistance
High deformability

NOZZLE BOLTED

Fast water filling

Equipment used in quarries for marble's, granite's and other natural stone's blocks extraction.

Hydrobags are filled with water through a pump. This generates a thrust that pushes the block away, respect to the mountain side, facilitating all overturning procedures.

PATENTED

LATO SUPERIORE PIEGATO

- ♦Cuscino più sicuro
- ♦25% in più di resistenza
- ♦Elevata deformabilità

BECCUCCIO IMBULLONATO

Riempimento
veloce

Attrezzatura usata nelle cave per lo sbancamento dei blocchi di marmo, granito e altre pietre dure.

I cuscini vengono riempiti con acqua per mezzo di una pompa e generano una spinta che consente al blocco di staccarsi dalla montagna, facilitando tutte le operazioni di ribaltamento.
